

SWB Wild Boar Block

Supplementary feed

Ingredients:

Crude protein 10.5 %, crude fat 5.5 %, crude fibre 4.9 %, calcium 6.0 %, trace elements

Composition:

Maize, wheat, rye, triticale, molasses, shell grit, calcium carbonate, monocalcium phosphate, sodium chloride, mixture of herbs

Benefits of the Wild Boar Block:

- Attractive bait feed for all age groups.
- Improves the regular frequenting of the bait sites.
- Bait sites do not have to be supplied with feed every day.

Recommended use:

Put the 5 kg SWB Wild Boar Block into the designated SWB Wild Boar Block holder. The stainless steel holder is screwed or fastened to a low tree trunk or heavy ground plate with four screws. Thus, the SWB Wild Boar Block can only be browsed or scraped off from above, a process that requires a lot of time and effort due to the block's hardness. As wild boars naturally do not stay in one location (bait site) for a very long time, they will return to a bait site still holding some of the SWB Wild Boar Block on the next day. That way, your bait site will be well-frequented for several days. Using the SWB Wild Boar Block is recommended for bait sites regularly frequented by wild boar.

Sales units:

SWB Wild Boar Block 5 kg (outer box 4 x 5 kg)

Pallet: 50 outer boxes (200 pieces)

Please observe the current national and international legislation on the feeding of wild game where applicable!
